GlobalMed.

Founded in 2002 by a Marine Corps Reserve Veteran, GlobalMed has a long and committed history to serving the virtual care needs of the U.S. Federal Government and are honored to be the telehealth provider for the White House Medical Unit, DHA, Army, Navy and Veteran's Affairs.

With a focus on security and integration, GlobalMed designs, manufactures and deploys fully integrated, evidence-based hardware and software telehealth solutions supporting specialties and acuity levels across the care continuum. With 40 million tele-consultations delivered in nearly 60 countries, GlobalMed empowers providers to connect with patients and deliver the health services and medical expertise they need - whenever, wherever.
